Education

Parala Maharaja Engineering College — Berhampur, Odisha
Bachelor of Technology in Computer Science — *Nov. 2022 – Jun. 2026*

Stewart Science College — Cuttack, Odisha
Higher Secondary (12th Grade) — *Jul. 2021 – Aug. 2022*

Queen Mary's High School — Cuttack, Odisha
Secondary Education (10th Grade) — *Apr. 2019 – Jul. 2020*

Experience

SDE Intern — Feb. 2026 – Present
Bandhure Solution LLP (Aivi.in) — *Bengaluru, India*

- Improved chapter-detection accuracy for educational documents by refining chapter-identification logic and handling headings, page structure, OCR variations, and ambiguous content boundaries.
- prompt engineering for multilingual educational responses across Indian languages, improving contextual grammar, verb forms, sentence structure, and textbook terminology while preserving factual accuracy and source grounding.
- Built the frontend UI of Intelligent Attendance Management System
- Automated end-to-end (E2E) UI testing across core user workflows using Playwright with Python, reducing manual testing effort by 75% and decreasing regression cycle time from 3 hours to 30 minutes.

Data Analysis Intern — Jun. 2024 – Jul. 2024
National Aluminium Company Limited (NALCO) — *Bhubaneswar, India*

- Analyzed 5+ years of LME steel and aluminium price data, improving forecasting accuracy by 18%
- Designed interactive Power BI dashboards, reducing manual reporting time by 40%
- Applied DAX formulas and data modeling techniques, enhancing decision-making efficiency by 30%

Projects

Intelligent Fraud Detection & Risk Scoring System | *Python, Pandas, NumPy, Scikit-learn, Matplotlib*

- Built an end-to-end fraud risk scoring system on 280K+ highly imbalanced transactions (0.17% fraud rate)
- Trained and compared Logistic Regression and Random Forest; achieved PR-AUC of 0.74 with Random Forest
- Optimized business-driven thresholds, reducing expected financial loss from 9500 to 1690 (80% reduction)
- Developed a rule-based decision engine to automate approve/review/block transaction workflows

Human Activity Recognition using LSTMs & GRUs | *Python, TensorFlow, Keras, Scikit-learn, Pandas, NumPy*

- Achieved 93% classification accuracy on UCI HAR dataset using deep learning models
- Reduced training time by 20% through optimized batching and model tuning
- Improved classification performance by 2% using confusion matrix-based evaluation and tuning

Sales Performance and Customer Segmentation Analysis | *Python, Scikit-learn, Pandas, NumPy, Power BI*

- Built an end-to-end data pipeline for 10,000+ retail transactions including cleaning, preprocessing, and feature engineering
- Designed ETL pipelines generating 6+ analytical tables (monthly, category-wise, gender-wise, age-group, RFM)
- Developed interactive Power BI dashboards with 5+ KPIs, time-series trends, and customer insights
- Performed RFM-based customer segmentation to identify high-value, repeat, and at-risk customers

Technical Skills

Languages: Python, SQL(MySQL), Java, C
Data Analysis & BI Tools: Power BI, Excel (DAX, Power Query), Matplotlib, Seaborn
Machine Learning: Scikit-learn, Random Forest, Logistic Regression, Classification, Feature Engineering, Imbalanced Data Handling, Model Evaluation
Deep Learning: TensorFlow/Keras, LSTM, GRU, CNN
Tools: VS code, Google Colab, Github, Neo4j, Playwright

Artificial Intelligence: Gen AI,RAG,LLM,GraphDB.
